

Assembly Instructions for: **Premium Range Great Wall Banner**

PAGE 1

1

Place foot/feet on floor and place bottom rail over nut.

2

Position pole/s within the larger hole and screw into nut. Turn in a clockwise direction to secure.

3

Unroll each Great Wall banner and place top rail onto the secured poles.

4

Position each panel of the Great Wall on its respective side.

**** Great Walls may come in two or more panels depending on your customised width ****

5

Join the banner rails together by simply pushing the black plastic joiner into the adjoining rail, at the top and the bottom.

6

Smooth and pull each panel of the Great Wall at each side so that it presents smoothly.

* Please find step 7 & 8 on the next page.

Assembly Instructions for: **Premium Range Great Wall Banner**

PAGE 2

Twist and turn all banner poles to ensure they are unlocked. Gently raise the two inner poles of the Great Wall in incremental steps, lock in the poles as the height increases. At full height raise each outside pole into the top rail of the Great Wall. Push up and tighten all poles individually so that the banner skins beat like a drum when fully erected.

Once erected, adjust the satin at the top and bottom to make sure the panels align. If needed gently release the tension of each pole and gently the banners to meet so they match perfectly.

Remember... Our exclusive Premium Range of Banners are:

- * Fully customisable to size, both height and width.
- * Customisable to a configuration of your choice at your requested sizing. i.e. 2,3,4 or more panels at different widths.
- * Easily re-skinable! Simply slip out an old skin and slip in a new one! You do not have to purchase a new stand or send anything back to us.
- * Covered by a LIFETIME WARRANTY against component malfunction. If any part is lost or broken, they can easily and inexpensively be replaced.
